2019

*Considerations for developing
simulations models for possible
future conflict
in the Middle East*

FRANK BELONUS

President & CEO

Falcon Desert International

(State of Kuwait)

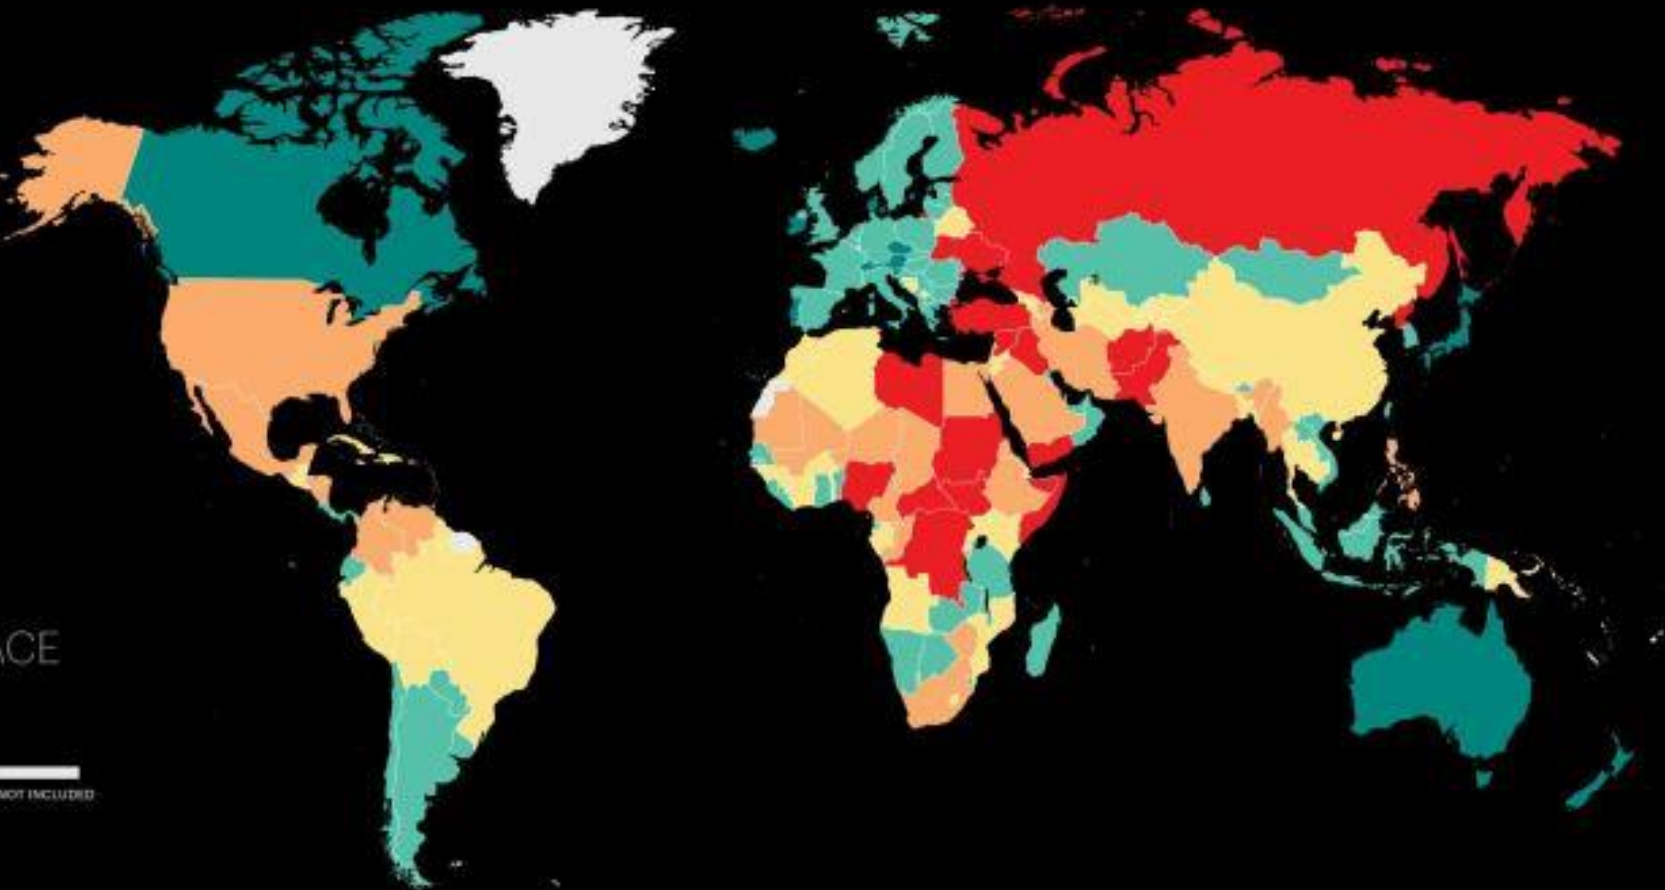

Global insecurity has not improved much over the last few years

2019 GLOBAL PEACE INDEX

A SNAPSHOT OF THE
GLOBAL STATE OF PEACE

THE STATE OF PEACE

IMPROVEMENTS
86
countries were more peaceful in 2019 than in 2018

DETERIORATIONS
76
countries were less peaceful in 2019 than in 2018

OVERALL AVERAGE CHANGE (%)
-0.09
The global GPI average improved 0.09 per cent from 2018 to 2019

Future threats

Top 10 risks in terms of Likelihood

- 1 Extreme weather events
- 2 Large-scale involuntary migration
- 3 Natural disasters
- 4 Terrorist attacks
- 5 Data fraud or theft
- 6 Cyberattacks
- 7 Illicit trade
- 8 Man-made environmental disasters
- 9 Interstate conflict
- 10 Failure of national governance

Top 10 risks in terms of Impact

- 1 Weapons of mass destruction
- 2 Extreme weather events
- 3 Water crises
- 4 Natural disasters
- 5 Failure of climate-change mitigation and adaptation
- 6 Large-scale involuntary migration
- 7 Food crises
- 8 Terrorist attacks
- 9 Interstate conflict
- 10 Unemployment or underemployment

Middle East emerges as the most vulnerable region to cyber-threats

Region ranks bottom in this year's FM Global Resilience Index

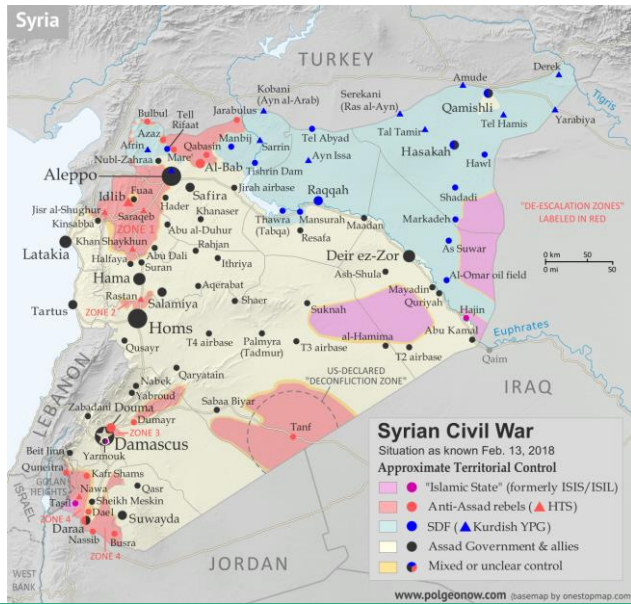

THE MIDDLE East has emerged as the most vulnerable region to cyber-attacks and associated risks, notes the latest 2017 FM Global Resilience Index.

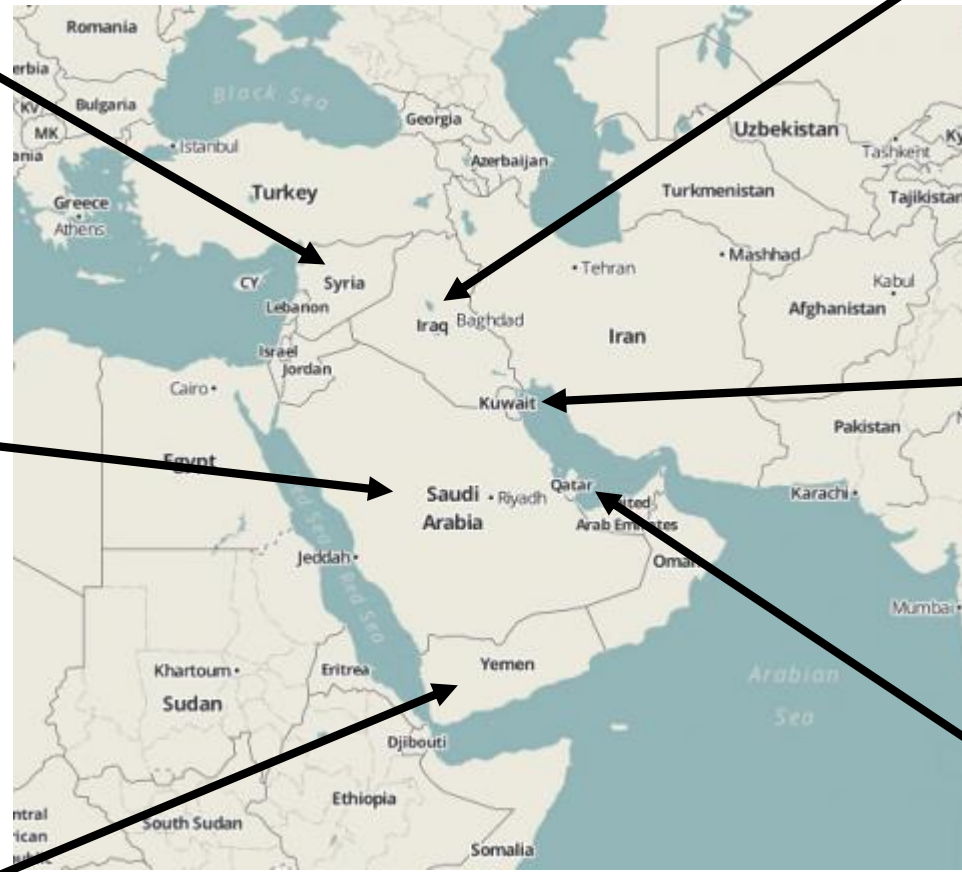

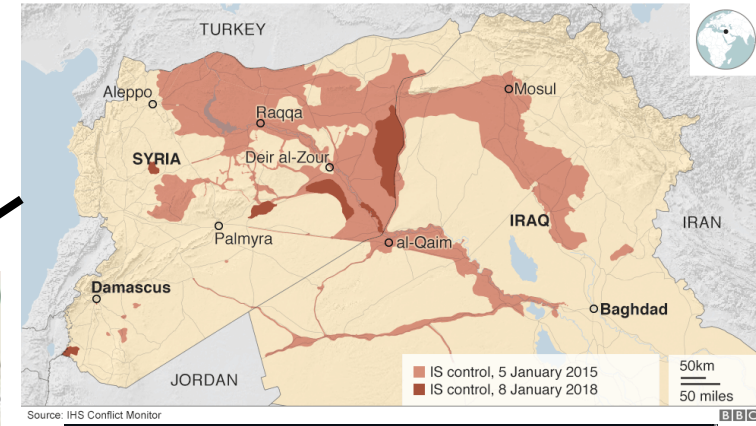

High internet penetration in the Middle East makes the region highly vulnerable to cyber-attacks, though its limited

Regional events today and near-future

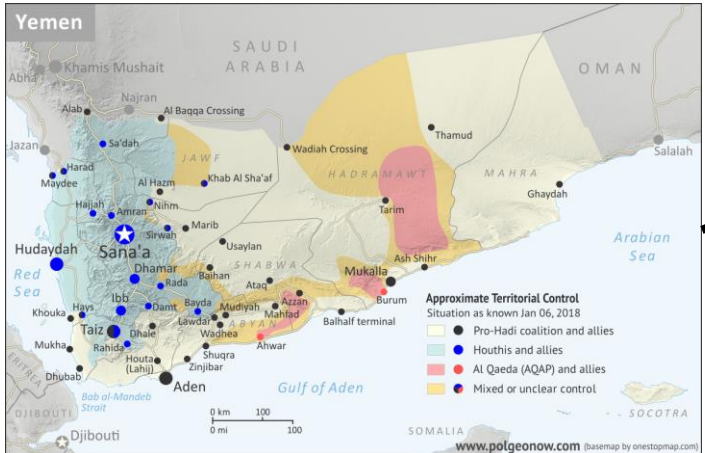

How much territory IS has lost since January 2015

More than 840 Terrorist Attacks Targeted Saudi Arabia Between 1979 and 2017

During the same period, security forces thwarted 223 of these assaults against the Kingdom, according to key Saudi security agency

- The Kingdom of Saudi Arabia was the target of a total of **841 terrorist attacks** from 1979 through 2017
- During the same period of time, security forces successfully **thwarted 223** of these attacks
- These operations claimed **3,007 victims**, including 333 security personnel. A total of 695 terrorists were killed and 346 injured.

GCC rift: Where do countries stand?

CUT TIES
 Bahrain, Comoros, Egypt, Eritrea, UAE, Maldives, Mauritania, Libya*, Saudi Arabia, Senegal and Yemen*

*Libya: House of Representatives based in the eastern city Tobruk
 *Yemen: the government of President Abd-Rabbu Mansour Hadi

DOWNGRADED TIES
 Chad, Djibouti, Jordan, and Niger

OFFERED MEDIATION
 France, Iran, Kuwait, Morocco, Pakistan, Turkey and USA

Security risks will likely continue into the near-future on many fronts

Understanding middle eastern threats to create simulation models and various scenarios for possible future conflicts

- In the Middle East these can be quite complex and change rapidly.
- **External threats** range from conventional forces and attacks, terrorist groups/organizations to lone attacks from individuals. There is also concern of spill-over from regional events, cyber-attacks, and the use of social media to recruit, create destabilization, incite attacks, or even for command and control of threats from external locations.
- **Internal threats** may include terrorist organizations already operating in the country, “sleeper cells,” extremist political groups, events or marginalized/disenfranchised members of the population causing protests and riots, “lone wolf” attackers, returning experienced fighters, and perceived government instability to name a few.
- **Environmental threats** should also be considered, such as the impact from local or regional environmental/industrial accidents or attacks, epidemics and pandemics. In the Middle East, sand storms, flash floods, and oil spills are also major environmental concerns.
- Ongoing Middle Eastern geo-political issues, Syria and Yemen highlight the need for “traditional” conventional forces training, but in the more stable countries the threat continues to be smaller, decentralized attacks, many using niche technology such as car bombs, suicide vests and the latest threat of weaponized drones.
- Concern is also exacerbated by the potential proliferation of advanced weapons, chemicals and even radioactive materials.
- Terrorist attacks are usually conducted by individuals or squad-sized forces, but there remains a concern of “sleeper cells” with caches of arms and explosives operating within some countries.
- Peaceful protests always run the risk of turning violent, and may be hijacked and manipulated to meet other objectives, such as creating destabilization and reducing trust and confidence in governments and governmental entities.
- All of these potential threats must be understood and used to drive predictability and preparedness.

Diversification and Modernization

“33 times the size of New York City”

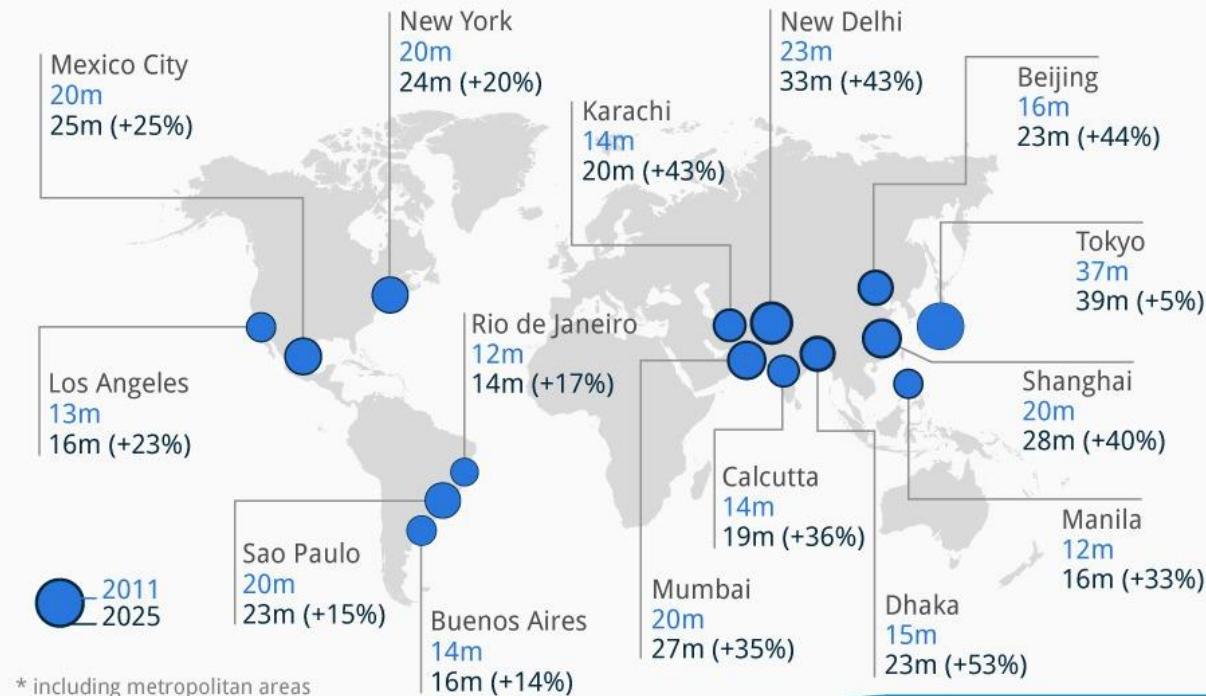

“Neom will have its own judicial system and government designed to attract international investors”

55% of the world's population lives in urban areas today, and is estimated to jump to nearly 70% by 2050 -UN

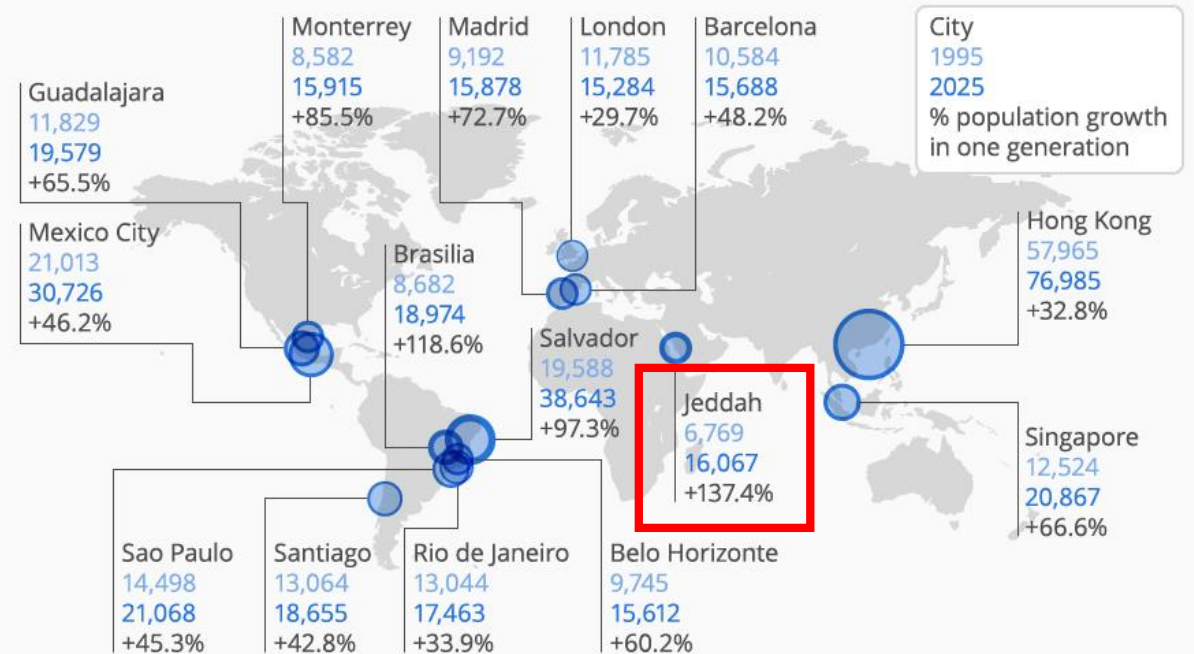

The 15 Fastest Growing Megacities

Population growth of the world's fastest growing megacities* (millions, 2011-2025)

The X Factor

Improvised Explosive Device (IED)

Percentage of Type of Attack per Target

Vehicle Borne IED (Car Bomb)

Drones

The use of commercial drones to conduct attacks, reconnaissance and surveillance continues to increase. It is expected that there will be 12 million drones operating by 2020.

Suicide Vests

Weaponized UAV with customized IED

Emerging Middle East interests from Simulations

Macro- diverse threats, mitigation focused, niche technology enabled, joint efforts

Micro- agile and adaptive junior leaders, realistic training in known environment

- Autonomous, robotic systems
- Virtual, fully immersive training
- Artificial Intelligence (AI)
- Realistic, 3D geo-specific databases
- Multi-system integration
- Multi-role, interchangeable systems
- Increased realism and feedback
- Online/distance learning and online pre-courses
- Outsourcing exercise developers, trainers and consultants

THANK YOU
