Dr Omar Al Ubaidly, Director for Studies and Research of [Bahrain Center for Strategic, International and Energy Studies](#) (Derasat) emphasised the importance of taking early steps against COVID-19 in ensuring the continuity of these segments. He said: "The question of how to balance health and economic interests during the pandemic is a very difficult one being faced by all countries at present. "What is certain is that any tradeoff between the two is significantly improved by having better levels of preparation and testing. In this regard, Bahrain's early steps have allowed it to maintain more normal lifestyles for its residents while still limiting the spread of the coronavirus."
