DERASAT LIBRARY

A Quarterly Newsletter

Inside this Issue

NEW E-BOOKS

The ProQuest E-Book Central contains specialty e-books, covering the subjects of science and technology. Read about the recently added books on page 2.

RANDOM SHUFFLE

Derasat Library offers more than 7700 print items. See featured books from Derasat Library's English collection on page 2.

GEORGIA 2020

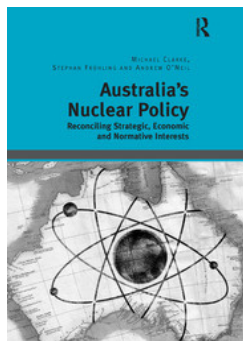

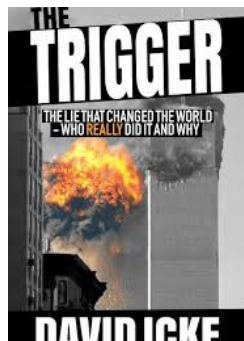

Read about this first in-depth report conducted by the EU4Energy programme (implemented by the IEA and the European Union).

POLITICAL SCIENCE DATABASE: OVERVIEW

This database –available on Derasat E-Library– gives users access to hundreds of leading journals in political science, public policy, and international relations. It also includes thousands of recent full-text doctoral dissertations on political science topics, together with working papers, conference proceedings, country reports, policy papers, and other sources.

The database covers the following subjects: political science, international relations, comparative politics, political economy, international development, environmental policy, human rights and migration. To get access to the Derasat E-Library (<https://derasat.deepknowledge.io/>), contact library@derasat.org.bh or call 17752734.

NEW E-BOOKS: E-BOOK CENTRAL

ProQuest Ebook Central, one of the e-resources available on Derasat E-Library, has uploaded new books to the collection, all of which are available for online reading.

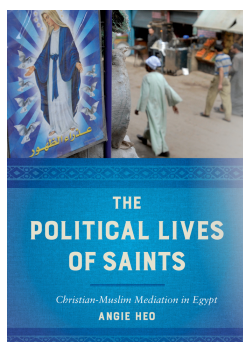

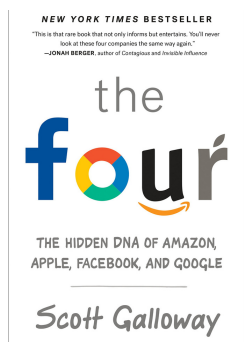

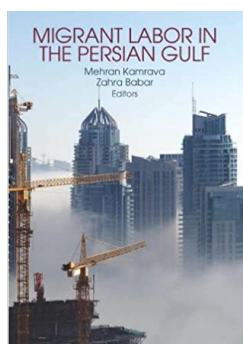

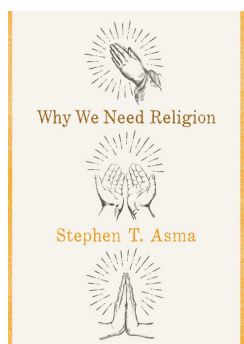

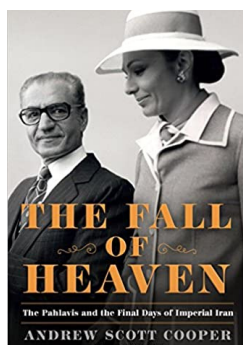

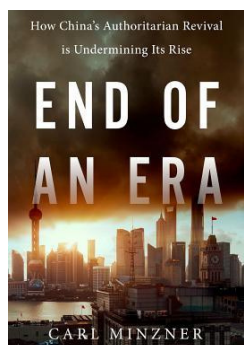

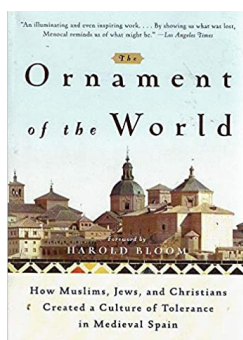

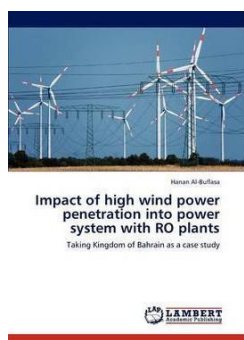

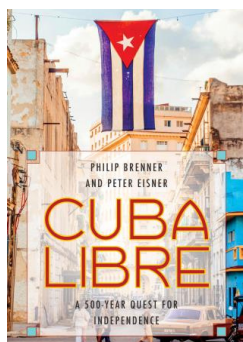

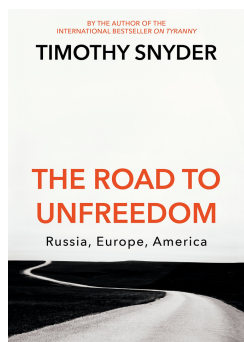

Titled **(On the Physiology of Voice Production in South-Siberian Throat Singing: Analysis of Acoustic and Electrophysiological Evidences)**, this book by Sven Grawunder is the first fieldwork-based phonetic study, which makes it worth reading.

A book that would interest chemists, physicists, astronomers and engineers is **(Spectra of Atoms and Molecules)** By Peter F. Bernath. It includes a clear presentation of group theory, needed for understanding the material, along with several problems. Selected papers (73 papers) from the 2019 ASCE International Conference on Computing in Civil Engineering, are published in **(Computing in Civil Engineering 2019: Smart Cities, Sustainability, and Resilience)**.

All these E-books are available to read online with a valid Derasat Membership.

GEORGIA 2020: ENERGY POLICY REVIEW

This report by the EU4Energy Programme updates and extends the analysis of energy policies in Eastern European countries, the Caucasus and Central Asia, that the IEA conducted in 2015. Since the 2015 review, Georgia has made solid progress in improving both the security and sustainability of its energy supply. The country entered into the EU-Georgia Association Agreement in 2016, and has become a Contracting Party of the Energy Community Treaty in 2017. Since then, it has made significant legal and institutional reforms, demonstrating the government's commitment to align its energy sector with EU regulations, for electricity and gas markets, security of supply, renewable energy and energy efficiency and statistics. The energy sector has been instrumental in establishing Georgia's overall economic policy, focused on creating a liberalized environment through minimal state interference, deregulation, privatization, reduced and simplified licensing and taxation, and free trade; earning the country the reputation of a "star reformer". Taking advantage of its favorable geographical situation, Georgia plays an important role in the regional trade of electricity, oil and natural gas.
